- 2-120 J/cm2 adjustable energy

TREATMENTS THIS ENABLES

Laser Hair Removal (Full Body & Face)

WHY THIS MATTERS FOR YOUR CLINIC

Laser hair removal is consistently one of the highest-repeat, highest-margin services in a dermatology practice, driving membership-model recurring revenue. Multi-wavelength diode platforms combine several wavelengths in a single handpiece so one machine can safely treat the full range of Indian skin tones and hair types, rather than needing separate devices.
