HIDL 1800W Diode Laser

Representative product image

KEY SPECIFICATIONS

- 1800W-class output
- 500mm LED skin/Al display
- Result-oriented premium build
- FDA approved

TREATMENTS THIS ENABLES

Laser Hair Removal (Full Body & Face)

WHY THIS MATTERS FOR YOUR CLINIC

Laser hair removal is consistently one of the highest-repeat, highest-margin services in a dermatology practice, driving membership-model recurring revenue. Multi-wavelength diode platforms combine several wavelengths in a single handpiece so one machine can safely treat the full range of Indian skin tones and hair types, rather than needing separate devices.
