TREATMENTS THIS ENABLES

Hydra Medifacials

Recurring Walk-In Revenue

Assisted Skin Analysis

WHY THIS MATTERS FOR YOUR CLINIC

This is the upgraded 10-in-1 hydra-medifacial platform. The **Assisted Skin Analysis** unit: it adds a built-in skin analyzer that turns every session into a visual consultation, plus a wider attachment set (nanocrystal infusion, oxygen therapy, bipolar RF) for tiered, higher-ticket facial packages. Sessions stay quick and fully delegatable to trained staff, making it one of the best walk-in-to-revenue converters in the clinic while also strengthening the case for premium membership pricing.
