KEY SPECIFICATIONS

- Depth-controlled Micro-Needle RF platform
- The recommended MNRF machine included in the Professional package

TREATMENTS THIS ENABLES

Acne Scar Treatment

Skin Tightening

Stretch Marks

WHY THIS MATTERS FOR YOUR CLINIC

Micro-Needling Radiofrequency delivers RF energy directly beneath the skin surface through fine needles, heating the dermis while minimising damage to the epidermis above it. This gives dramatic scar and tightening results with less downtime than ablative lasers, and is well tolerated across all skin tones - important in the Indian market.
